St. Paul October 2004 GW Monitoring:

GROUNDWATER: St. Paul GW Monitoring Status Overview

- Previously, GW Was Sampled up to 9/11 (IT), Then Stopped
- NOAA Resumed Sampling With October 2003 Sampling Round (results summarized on next slide)
- Next Sampling Round Was Completed in January 2004 (results not in yet)
- Sampling Rounds Planned for April and July 2004
- Next GW Report Will Include Summary of All Sampling
 And Analysis of Trends Through 2004

GROUNDWATER: St. Paul October 2003 GW Sampling Results:

- **48 WELLS SAMPLED:**
 - 1. Ice House Lake
 - 2. Landfill
 - 3. Lukanin Bay
 - 4. Tract 46/Village
- About ½ of all wells have never exceeded the Table C cleanup levels
- Wells That Never Exceeded Cleanup Levels Still Don't
- Most Contaminant Levels Have Decreased, some increased by small amount
